For Immediate Release

FREEPORT PRESS UPGRADES KOMORI SYSTEM 38S WITH THE RIMA RS 610-003 MULTI FORMAT AUTOMATIC LOG STACKER SYSTEM.

Freeport, OH, January 11th, 2011 – Freeport Press continues to make investments by upgrading equipment in order to improve processes and gain production efficiencies. The Rima-System RS 610 log stacker is the premier choice in automatic log stacking. Based on the proven technology, the RS 610-003 "Multi" - formats A5 to A3/"Slim Jim" to Tabloid distinguishes itself with superior log building technology. Perfect ergonomics are guaranteed by easy accessibility and by the designed separation of the machine into an operator and a maintenance side.

The combination of the RS 610 horizontal log stacker with the RS 650 log palletizer along with a full RS 34 compensating stacking backup system allows seamless uninterrupted product delivery from the fastest make-ready commercial heat-set web offset press in the market. "We couldn't be more pleased with the log quality in all formats we produce. Rima-System has designed a machine that can handle every product format we can throw at it. This press delivery system has been a tremendous upgrade in efficiency for our operation," states James Pilcher VP Manufacturing / GM for Freeport Press Inc.

About Freeport Press Inc.

Freeport Press Inc., is a leader short run niche publication and catalog production. Founded in 1880, Freeport Press is focused on being the most efficient manufacture of high quality short run publications and catalogs in North America, through continued investment of state-of-the art technology, as well as continued investment and development of our employees, systems, and facilities.
