Digital Camera Info Standard Prints to Digital Print Size

4x5 @ 72dpi = 360x288 pixels @ 266dpi Image size would be 1.353w x 1.083h

4x6 @72dpi = 432x288 pixels @ 266dpi Image size would be 1.624w x1.083h

8x10 @72dpi = 576x720 pixels @266dpi Image size would be 2.165w x 2.707h

12x16 @72dpi = 1152x864 pixels @266 image size would be 4.331w x 3.248h

22x16 @72dpi = 1600x1200 pixels @266 image size would be 6.015w x 4.511h

Many of the new 2.3 and 3.1 mega pixel cameras will allow you to take pictures
At the 1600x1200dpi setting many of the 1.3-mega pixel cameras will do about 8x10 setting
Some of the higher end 1.3 will allow other pixel settings you would need to see there
manufacturer For this info it is usually found at their web site under the specifications for their
model.

The 266dpi is the Min; 300dpi is our normal setting we use for the Image setter to create the
proper line screen on film or plate.

If we are unable to achieve this setting the image will have a pixel look to it.
